Inhibiting action of carbon black on radical polymeri-
zation is demonstrated in a series of polymerizations
of styrene and of acrylic nitrile in the presence of
carbon black. Examples show clearly that the ac-
ceptor centers of carbon black neutralize free radi-
cals as soon as they are formed, thus stopping the
radical polymerization of these vinyl monomers just
as it begins. Results are tabulated for thermal poly-
merization of styrene in benzene solution, for emul-
sion polymerization of styrene in the presence of
